## Care Module

OTT Communications' MivaTek *Care Module* includes a panic button so your loved one can alert you in an emergency and a fall detector to alert you to a fall if for some reason your loved one can't. The included HD camera provides two way audio communication capabilities, and a 16 GB flash storage device will store camera data. A remote key fob gives you additional control, and a siren can be programmed to alert the neighbors when an emergency event occurs.

### Benefits

The Smart Hub, included with the *Care Module*, manages all devices on your secure, personal network.

- ◇ Mobile push alerts immediately contact entrusted friends, family members, or caregivers when the user pushes the panic button.
- ◇ With video installed, you will be able to view real-time video of your home to assess the situation, or call your connected friends, family, or police for help.

### Includes

- 1 Panic Button
- 1 Fall Detector
- 1 HD Mini Cube 2-way Audio Camera
- 1 16GB Flash Storage Device
- 1 Remote Key Fob
- 1 Siren

### Optional Accessories

#### Medicine Dispenser

Programmable Wi-Fi medicine dispenser for scheduling, reminders to the person who needs the medication, and alerts to family members if the medication is not taken on schedule

#### Medicine Tracking Sensor

Keeps track and reports when meds are taken.

#### Activity Tracking Sensor

A professionally calibrated sensitivity tracker keeps track of a loved one's daily routine when the sensor is attached to various items and appliances around the house

#### Inactivity Alert Sensor

Use this sensor to inform you when no movement is detected in your loved one's home. The sensor will trigger an alarm if there is no activity for designated period of time that you program up to 24 hours.
